Tarragona is a lovely, lively city by the sea, with lots to see and do and it's only 8 miles (12 km) away from the theme park, Port Aventura.

The area has some great beaches, one of which is overlooked by the Roman Amphitheatre. Tarraco/Tarragona was the capital of the Roman Empire in Hispania, and the amphitheatre that you can see today is where they used to have all sorts of entertainment, including gladiators.

El Serrallo, the fishing district of Tarragona, is a great place to take your parents one afternoon. El Serrallo is packed with character. You need to get there before 3.30 pm to see the fishermen coming into the port with their catch of the day. You get to see that fish don't just come from supermarkets and fishmongers!

It's a pretty cool photo opportunity as well. You'll know that the fishermen are on their way because of all of the seagulls, that escort the arrival of the colourful fishing trawlers.

Around the port, there's plenty to do. If Mum and Dad fancy a drink, don't worry they will have plenty of places to go at the Moll de Pescadors – the fishermen's dock. They can sit and have a beer, while you explore and take photos.

## 9. Visit the bridge that the devil made – The Devil's Bridge

The aqueduct called Les Ferreres is one of the landmarks of Tarragona, and is known locally as the Devil's Bridge. It gets this name from an interesting legend, more about that in a moment. As well as the impressive aqueduct, there is an ecohistoric park there.

It's a lovely spot to explore the local nature and maybe bring your parents for a picnic. The first Saturday of each month is a big family day out there traditionally, with parents and children getting together to enjoy the privileged environment and famous monument.

According to the legend, there was an elderly couple who needed to cross the old wooden bridge, that used to be in the same location, to go to market each day. The couple had a donkey to help them carry their goods to the market. One night there had been a very dramatic storm, so when the couple reached the old wooden bridge the next day, it had been destroyed. The man felt useless, knowing that he was no longer young and strong enough to build a new bridge.

The couple were in shock and feeling really worried about their situation, when a mysterious stranger appeared, as if out of nowhere. He asked them about their troubles, so they explained what had happened. The stranger said he would build a new bridge for them. The couple asked what he wanted in exchange for the new bridge. He replied that he would want the soul of the first creature to cross the new bridge. After some time, they agreed, as they had no other solution. Of course they already knew that if the man could build a bridge for them like this, he had to be the devil himself.

The next morning they walked to the place of the old wooden bridge, and there was a fine impressive new bridge there. The stranger had carried out his part of the bargain, now it was their turn. The woman used the rod to get their donkey moving and the three started walking over the new bridge. The donkey was the first one to cross. The devil was very angry, but there was nothing he could do, except take the soul of the poor creature.
